Business Continuity Specialist

Description

We are seeking a seasoned Business Continuity Specialist with a minimum of 5 years of experience to design, implement, and maintain robust business continuity strategies. You will play a pivotal role in safeguarding our IT infrastructure, ensuring rapid recovery during disruptions, and minimizing downtime. Your expertise will guide risk assessments, plan development, cross-departmental collaboration, and post-incident analysis to fortify organizational resilience.

Responsibilities

- Create, update, and test comprehensive business continuity plans for critical systems, data, and applications.
- Identify vulnerabilities through Business Impact Analyses (BIA) and recommend mitigation strategies.
- Partner with IT, cybersecurity, operations, and external vendors to align DR strategies with business goals.
- Lead recovery efforts during disruptions, ensuring swift restoration of services.
- Conduct regular drills (tabletop exercises, failover tests) to validate plan effectiveness.
- Maintain detailed recovery procedures, contact lists, and post-incident reports.
- Educate staff on BC protocols and roles.
- Assess emerging tools (e.g., cloud recovery solutions, backup systems) to enhance resilience.
- Ensure adherence to industry standards (ISO 22301, NIST) and regulatory requirements.
- Analyze incidents to refine strategies and prevent recurrence.

Qualifications

- Experience: 5+ years in Information system support, administration, risk management and business continuity
- Experience in GSM and Mobile communications technology, IT and network infrastructure, IT systems administration, Database management, and cybersecurity.
- Experience in cloud technologies
- Possess skills in testing emergency response, recovery support and business
